

System Requirements for EnlightKS Online Certification Management Services

ET2.10 January 2010 Release

EnlightKS Candidate, EnlightKS TestStation Manager, EnlightKS Certification Manager

- **Operating System:**
 - Microsoft Windows 2000/XP/Vista/7.
 - Mac OS X 10.5.
- 128 MB available RAM.
- Display resolution of at least 1024x768 pixels with 16k colours.
- Web browsers:

PC

Internet Explorer, version 6.0, or later.
Firefox, version 3.0 or later (3.5).

Mac

Safari 3.0.

- Browser plug-in with support for Java:

System	Supported Java versions	Recommended Java version
PC: Microsoft Windows 2000, Windows XP	Sun Java versions: 1.5.0, 1.6.0	Sun Java versions: 1.5.0_13 – 1.5.0_22, 1.6.0_17
PC: Microsoft Windows Vista, Windows 7	Sun Java versions: 1.6.0 > 1.6.0_11	Sun Java versions: 1.6.0_17
Mac	Sun Java versions: 1.5.0, 1.6.0	Sun Java versions: 1.6.0

- Please Note! To avoid problems for our users EnlightKS need to test and approve all new versions of Sun Java. This means that EnlightKS do not automatically support the latest version of Sun Java as soon as it is released.
- For viewing and downloading the latest version of Sun Java that EnlightKS recommends please visit the download area at www.enlightks.com (http://www.knowledgeuk.com/index.php/main/show/0/113/ECDL_downloads_manual)
- Please Note! The Microsoft VM is no longer a supported Java virtual machine. You may still use it at your own risk. Future versions of ET2 may not work with Microsoft VM. The recommended upgrade path is to switch to Sun Java where possible.
- Access to the internet. Download speed requirements vary with number of users and usage patterns. We recommend 60 Kbit/s per active connection, but no less than 500 Kbit/s in available capacity.
- Users allowed to download files and run signed Java Applets.
- Firewall: allow HTTP- and HTTPS traffic to external servers.
- Pop-ups allowed for the enlight.net domain name during testing. See FAQ at www.enlightks.com for further information. (http://www.knowledgeuk.com/index.php/main/show/0/134/et2_faq)

EnlightKS In-Application

- Operating system: Microsoft Windows XP/Windows Vista/Windows 7
- Microsoft Office 2003 or 2007
- An additional Microsoft Office component, Primary Interop Assembly, may be required for your Office version. This is normally installed with Office if you have .NET installed. Otherwise it can be downloaded from www.enlightks.com.
- Microsoft .NET v3.x. Download link provided at System Requirement Check page and also at www.enlightks.com
- The user should be allowed to save files to the Documents folder. ("My Documents" in Windows XP)
- The Documents folder should not be shared between multiple users that are using ET2 at the same time.
- Normal read access to the Windows Registry is required and write access to the Windows Registry areas where the user's settings are stored. These are the default settings in Windows for a non-administrator user.
See FAQ at www.enlightks.com for further information.
